PROFESSIONAL SUMMARY

Software Developer and BSc (Hons) Software Engineering student with 5+ years of production IT and application support experience. Builds full-stack applications using JavaScript, React, Node.js, Python and SQL, with hands-on experience developing REST APIs, integrating third-party services, testing software and supporting production releases. Supported business-critical systems across 170+ branches and collaborated with external development teams to investigate defects and deliver reliable software solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java, C#, HTML5, CSS3
Frontend: React, Tailwind CSS, Bootstrap, Responsive Web Design
Backend: Node.js, Express.js, REST APIs
Databases: PostgreSQL, MySQL, Firebase
Cloud: AWS, Google Cloud
Tools: Git, GitHub, Postman, CI/CD, Agile/Scrum, Microsoft 365

PROFESSIONAL EXPERIENCE

Software & Application Support Specialist

Torga Optical Lens Manufacturing — Cape Town, South Africa
Dec 2020 – Jul 2026

- Supported software testing, deployment and production operations across 170+ branches, helping maintain reliable business-critical application releases.
- Collaborated with external software developers on feature development, software testing, troubleshooting and production bug resolution.
- Investigated, reproduced and documented application defects, providing developers with actionable technical information to accelerate issue resolution.
- Managed software testing and release validation across distributed business environments, identifying defects before production deployment.
- Supported UAT by working with business and technical teams to verify application functionality against operational requirements.
- Assisted with application configuration, troubleshooting and deployment across a diverse business systems environment.
- Partnered with marketing and technical teams to implement digital content solutions, contributing to a 30% increase in customer engagement.

IT Support Technician

Torga Optical Lens Manufacturing — Cape Town, South Africa

Dec 2020 – Jul 2026

Held concurrent responsibilities across IT and Software Applications Support

- Supported and troubleshooted 18+ business-critical IT and software systems, maintaining operational continuity across distributed branch environments.
- Diagnosed hardware, software, network and application issues and provided technical support to users across the organisation.
- Developed and delivered structured technical training for staff, contributing to a 30% reduction in support tickets.
- Worked directly with end users to identify operational requirements, troubleshoot issues and improve adoption of business systems.
- Supported users across a distributed branch environment, resolving technical issues while minimising disruption to daily operations.

PROJECTS

CYFOverflow — Full-Stack Q&A Platform

JavaScript | React | Node.js | PostgreSQL

- Developed a full-stack Q&A platform where users can post questions, submit answers and vote on content.
- Built RESTful APIs connecting the React frontend with the Node.js backend and PostgreSQL database.
- Implemented asynchronous data fetching and dynamic UI rendering.
- Developed a responsive, mobile-first interface with accessibility considerations aligned with WCAG principles.
- Why it stands out: Demonstrates end-to-end full-stack development across frontend, backend, database and API layers.

Pop & Chill — TV Discovery Application

JavaScript | TMDB API | YouTube Data API | CSS3

- Built a media discovery application with live search, filtering and dynamic content rendering.
- Integrated the TMDB and YouTube Data APIs to provide movie and TV information with in-page trailer playback.
- Optimised API response handling and frontend rendering to improve application performance.
- Why it stands out: Demonstrates practical experience integrating multiple third-party APIs into a user-facing application.

Boroma Hills Website

HTML | CSS | JavaScript | Responsive Web Design

- Designed and developed a responsive website presenting information and services for Boroma Hills.
- Built layouts optimised for desktop and mobile devices.
- Implemented structured navigation and user-focused content presentation.
- Deployed and configured the production website using Netlify.
- Why it stands out: Demonstrates the ability to take a project from development through deployment to a live production environment.

EDUCATION

BSc (Hons) Software Engineering

Zimbabwe Open University – Started 2024

Part 3.2 | Expected Graduation: 2027

Relevant areas include software development, programming, databases, AI, web technologies and software-engineering practices.

Software Development Programme

CodeYourFuture – Part Time Hybrid Training

Period: 2024 - 2026

Full-Stack Software Development

Completed an intensive full-stack software development programme focused on practical application development, collaborative development workflows, Git/GitHub, frontend and backend development, APIs, databases, testing and Agile teamwork.

ADDITIONAL TRAINING

CS50's Introduction to Python

AWS Cloud Practitioner Essentials

Responsive Web Design

Harvard University

Amazon Web Services

freeCodeCamp
